

High Speed Meat Slicer

NBC-330L II / A II / H II

Diameter

φ 390mm

Edge cutter attached, slicing sharply

- DC brushless motor has been incorporated. Energy saving is provided.
- Easy to remove and reassemble the feeding conveyor, and hygienic.
- Front panel for receiving sliced meat has been modified to widely, and high workability has been developed.
- 24V low voltage operation circuit is used. Blackout safety circuit design has been incorporated.
- 75 slices/min. at high speed, and stable slicing
- Blade cover attached, cleaning safely

Blade cover
(Standard accessories)

Foot switch
(Option)

Specification

Power	200V/3Ph 60Hz/50Hz
Motor	Container 0.75kw (Brushless) x 1unit Blade 0.4kw x 1unit
Container gear shifting	Controlled by brushless motor
Slicing Speed	35-65 slices/min (L II type) 35-75 slices/min (A II/H II type)
Slice Thickness	(0) to 20mm
Slice Dimensions	W330 x H200 x L710 (mm)
Max. load of meat	23kg
